

ComplyWorks at a Glance

Compliance management made easy.

ComplyWorks is a global leader in compliance management solutions. For 15 years, our easy-to-use, scalable and affordable web-based solutions have enabled businesses to streamline their entire compliance lifecycle including third-party contractor, workforce and worksite management. Our tailored solutions are fit-for-purpose, helping to increase the productivity of your GRC function, mitigate operational and reputational risk, and decrease costs associated with manual data collection and reporting.

What makes us different

ComplyWorks is headquartered in Calgary, Alberta with offices across Canada, the United States and South Africa. We boast a global reach with local deployment, providing tailored solutions to customers in over 90 countries across the globe. Our solutions are future-proof; they grow with your business, adapt to industry regulations and evolve with your requirements.

ComplyWorks at a Glance

Compliance management made easy

“The people at ComplyWorks separate it from the competition. We are very impressed with the service we receive from all of the ComplyWorks teams.”

– Dynacorp, Manager Corporate Development

Increase quality control, productivity and compliance

Decrease risk, paperwork and costs

What we do for you

ComplyWorks offers a suite of integrated solutions to improve health, safety and environmental (HSE) compliance for businesses in heavily regulated industries including mining, oil and gas, forestry, manufacturing, healthcare, construction, telecommunications, utilities, commercial real estate and more. Our solutions are designed to help you collect, verify, monitor and report on data including:

Contractor management – Our Corporate Compliance Management Solution enables businesses to prequalify third parties, ensuring they comply with regulatory and corporate requirements through our verification process. Benefit from the ability to digitally assign training, post information bulletins and approve contractors for work while reducing internal administration time.

Worksite management – Use our Active Compliance Monitor to digitally track and manage remote worksites from anywhere in the world. Ensure your geographically sprawled divisions, field offices or projects are compliant with local regulations by setting compliance requirements at a site level.

Workforce management – Get face-to-face with your employees and equipment from around the world with our Workforce Management Solution. Digital records with automated expiration reminders provide you with a holistic view of your workforce, allowing you to track security clearances, medical approvals, tickets and certifications for each employee and asset.
